

BONBONS AND NAPPIES

2005 HOACGA NOTEBOOK SECTION

Embroidered Mums

by Bob Grissom

The 2005 Notebook Section contains information on what are commonly called bonbons and nappies. Fifty bonbons and sixteen nappies are identified and described in this section. The dictionary states that a bonbon is a small piece of candy. A bonbonniere is a dish to hold bonbons. So, I guess we have a dish to hold bonbons. The nappy is defined as "a shallow, flat-bottomed, rounded dish with sloping sides, used for serving or cooking food." Regardless of the dictionary definition we all know what the item is when we say "bonbon" or "nappy." It either has one or two handles.

This section is presented for the purpose of recording and providing information about the various bonbon and nappy patterns along with a picture of the item (if available). This information is presented for the benefit of the present and future Carnival Glass collector by the HEART OF AMERICA CARNIVAL GLASS COLLECTORS ASSOCIATION.

Special thanks to these collectors:
