

## REGULAR & SMALL COMPOTES

This is the second and concluding section on Compotes. This section covers the Small Compotes-6" tall or 6" wide or smaller. This information is assembled and presented for the continuing information and benefit of the Carnival Glass collector, it is hoped that you will find this information helpful.

The pattern identification is listed as inside/outside pattern. Some pattern colors are listed as (S) scarce & (R) rare.

This section has been a little more difficult to prepare than previous sections. Many collectors have some compotes in their collection but it is not an item they specialize in, so the information and photographs were not as readily available. Most compotes did not get the same attention as some of the more popular items within our hobby.

Many thanks to those H.O.A.C.G.A. members who supplied photographs and information about the Compotes.

These members supplied photographs and/or information of their Compotes.

John & Lucile Britt	Manhattan, Kansas
James & Ardonna Bucher	Imperial, California
Don & Barbara Chamberlain	Manchester, Iowa
Robert & Donna Courts	Batavia, Ohio
Gordon & Noreen Curtis	Himrod, New York
