THE FIDDLER CLOWN
BY
WILMA THURSTON

This is thirteenth in a series of glass made in the 1980's.

The Fiddler Clown was made by Mosser Glass Company of Cambridge, Ohio.

He is 3 3/4" high and has his fiddle under his chin ready to strike up a tune. Each clown has it's own name pressed on the top of his hat, to help identify them.

There were 18 in the series. They were made in a different color each month. There was one #19 that was hand decorated. These were probably given to the dealers. There was also a cup plate made in matching colors.

You can still find these clowns, but they are not easily found, and to put a whole set together would take a lot of looking.

THE FIDDLER
