## PUNCH SETS APRIL 1995

The original section of the HOACGA Notebook was on Punch Sets. The information in this section on Punch Sets has been revised and updated and hopefully is more complete and current.

This information on Punch Sets is assembled and recorded for the educational benefit of the Carnival Glass collector.

The preparation, compiling and presentation of this information would not have been possible without the time and help of several knowledgeable HOACGA members.

Thanks go to the following members who provided pictures, comments and information pertaining to the various punch sets presented here.
